

### Deliver quickly and without compensation

For sending two-wheelers (bicycles, scooters, mopeds, etc.) we have special vehicles and tools in house.

These are necessary to get the products safely and without damage to the customers. A two-wheeler is a product with many moving and fragile parts, which can break easily due to errors in transport.

For example, it is important that a derailleur or brake disc is additionally protected during transport. This way your customers can immediately enjoy their new two-wheeler.
